

RS0102

Dynello Rewinder II

DESCRIPTION

Dynello Rewinder II is a handheld electric strap winder and the second model in the Rewinder series and comes with a new DC-motor with increased torque.

The electric strap winder is specially designed for the full-time truckdriver, who uses lashing straps daily and want the straps rolled up quickly and the 'right way'.

Dynello Rewinder II can roll-up a lashing strap in less than 10 seconds and up to 300 straps on a single charge with the efficient lithium-ion battery. This is equivalent to 1-2 weeks of battery life with daily use.

Roll-up wet, worn, dirty and lightly frozen lashing straps. Built into the tool housing around the shaft is a water-repellent felt gasket that protects against water ingress.

Dynello Rewinder II is made for European Standard lashing straps with a maximum width of 50mm (typically 5 tons straps). Charge the tool with charger 230V AC and car charger 12/24V DC, both included.

Dynello Rewinder II is CE certified.

SPECIFICATIONS

- Fits 0-50 strap-width
- Lithium-ion battery
- Battery 12V 1.3Ah
- Speed (no load) ~250 RPM
- Shaft sealed with gasket
- Direct charging in battery
- Recycled cardboard packaging
- Weight (tool): 750g
